

It's easy to get charged up over the fun and excitement generated by J&J's Bumperboats.

J&J has been building bumperboats from the beginning. That's right, the bumperboat was thought up at the J&J head quarters. We've been building & refining the bumperboat ever since.

Our gas powered "Waterbug" bumperboat has been the staple of the industry for over 30 years! Its often been copied but never duplicated. Powered by a reliable 4-stroke engine, the Waterbug will just keep bumping along day after day.

We've also developed an electric powered bumperboat: The Blaster Boat. It's easy to get charged up over the fun and excitement generated by J&J's Blaster Boat electric bumper boat. This fun ride could easily be called the "Stealth" bumper boat! Featuring an ultra-quiet 24-volt electric motor, the only sounds you hear are splashing, laughter and people having fun. Where ecological impact is a genuine consideration, Blaster Boats really shine. Because it is electric, there are absolutely no exhaust emissions, gasoline, oil changes, spark plugs or recoil starters to deal with. Water treatment is easy and much less expensive than with gas powered boats.

Take your pick! J&J builds both gas and electric powered bumperboats!

Is it time to get your feet wet? Come on in, the profits are great!

Waterbug, gas powered

Blaster Boats, electric powered with interactive squirters

Spring Steel Bumper

J&J go-karts are the most rugged in the industry. Even so, our go-karts need a bumper system to absorb the everyday bumping and abuse a concession go-kart track dishes out. These heavy duty spring steel bumper rails are used in conjunction with rubber bumper cushions (A-Rubber) to take the shock out of the eventual brush against the wall or other go-kart.

Gas or electric powered? You choose. We have equipped some of our models with optional, industry leading electric motors and equipment for trouble free operation.

Engine Upgrades

The standard Honda 5.5hp engine can be upgraded to 6.5hp, 8.hp or a huge 9.0hp engine. These engine upgrades enhance the performance of the go-kart dramatically. More horsepower and torque mean faster acceleration and a more fun ride that may make your customers come back for more.

Electric powered option

J&J has chosen a system based on a protocol developed and proven by Industrial Electric Vehicles. This dependable system utilizes the power of 4 12vdc batteries to develop the required torque to make the ride fun. J&J Go-Kart charging stations can be either floor or overhead mounted in the Go-Kart pit lanes.

J&J also carries a full line of parts and accessories for your go-karts, bumperboats, and park through our parts division, Fun Parts Xpress. From bumperboat pond dock rails to battery chargers and track control systems. Visit www.funpartsexpress.com to learn more .

The highest quality, best performing go-karts & bumperboats in the concession industry.

From childrens go-karts up to full size double seat gas and electric powered go-karts, J&J has it all covered. Our line up of tough, industry proven go-karts are built to withstand the rigors of concession go-karting and keep running hour after hour, day after day,

Zinc Phosphate & Powder Coated Chassis

Each J&J go-kart is hand assembled starting with our legendary "unitized steel chassis". This unitized steel frame chassis is revolutionary. We developed this chassis back in the 90's, and it's been through the test of time with many upgrades along the way. Each chassis is put through a 9-step process that ends in a zinc phosphate dip and coat process and then is electrostatically powder coated to resist

scratches and rust. We have found this to be superior to anything we have tried in the past including hot dip galvanizing to control rust and keep the chassis looking great for years. Some of the most recent upgrades to this chassis include the introduction of "bolt-on" components for easy replacement and longer base chassis life.

Roll Bar

Each J&J go-kart is equipped for roll-over protection with the inclusion of a frame mounted tubular steel padded roll bar.

These are just some of the many features and options available on J&J go-karts. Be sure to visit our internet site at www.jjamusements.com to learn more.

Are you ready to hit the track running? Climb aboard with J&J and be backed by the industry leader!
