

SIDEWINDER

The Sidewinder is Super!

This kart has great looks in an enclosed body that easily accommodates driver and passenger. The double wide set-up allows youngsters that are not tall enough to drive their own kart, the fun and excitement of go-karting.

Sharing the well-proven J&J chassis with its brother, the Sidekick, this double kart has an updated style and the ability to carry more fuel with an optional 4.7 gallon tank. Fill it once a day!

A safe, stylish money maker, the sidewinder's only competition comes from other J&J double seat go-karts.

As always, this go-kart has many color/graphic options and is sure to look as good as it performs!

Give J&J a call today and order your fleet!

Visit our website at www.jjamusements.com for more exciting information including photos and color combinations.
