Batteries wired in parallel for high reserve capacity

Master On/Off switch combines with circuit breaker

Choose from classic bright red or brilliant yellow

Falcon go-karts available in red or yellow.

Constant development of our products necessitates that specifications are subject to change.

The batteries - Each Falcon go-kart is equipped with two batteries, wired in parallel for a high reserve capacity. This allows the Falcon to “keep on going” like that little rabbit. Owners report all day service on a single charge.

Built In Automatic Charger - The Falcon features an on board charging system mounted near the batteries. No need for external chargers, just plug it in! Charger features 110/220 switch.

Power System - The Falcon Go-kart features an On/Off switch and a continuous duty relay to eliminate potentiometer and expensive controller.

NiChrome Wire Resistor - J&J’s Falcon Go-kart utilizes a simple NiChrome wire resistor to statically control top speed. No electronics to cause problems.

This new “electric” powered go-kart can handle drivers up to 100lbs.

Kids can take control with steering wheel mounted manual controls (accelerator and brake). The kart is suitable for children aged 5 years and older and comes complete with a full surround bumper, pneumatic tires and steel rims ready to handle the rigors of daily concession use.

SAFETY FEATURES - J&J’s Falcon Go-kart hosts many safety features including seatbelts, back and head pads, overload circuit breaker, 1/2” x 4” virgin UHMW wrap around bumper and “easy reach” hand controls. Optional remote control shutdown available.

FALCON SPECIFICATIONS:

- MOTOR TYPE: 12-Volt DC Motor
- BATTERY CAPACITY: 2 Gel cell 12-Volt DC
- CHARGE TIME: 6 HR
- CHARGING: 12 VDC, 12 Amp
- SPEED: Factory set at 3mph
- REAR BRAKES: MECHANICAL DRUM
- FRONT TIRES: 11X4.0-5
- REAR TIRES: 11X4.0-5
- WHEEL BASE: 32.8/840 in/mm
